What can WE do about it? Smart City sharing solution.

What can WE do about it?

Smart City sharing solution.

Instructions in four steps

1. Find and book

After logging into the application, find the nearest scooter and book it for free. You have 15 minutes to get to the vehicle, you can use the navigation to get there easily.

2. Start

After pressing the button "start" in the application you get 2 minutes free to get ready for the ride. Open the rear box with the blue button, put on the hygienic cap, helmet and you are ready to go.

3. Ride

Enjoy the fast and eco-friendly ride. According to numerous studies, a scooter is the fastest means of transport in the city.

4. Park and finish

Have you arrived? Put the scooter on the central foot, put the helmet back in the box and click "finish". You will receive a summary of your journey by SMS and e-mail. It was fun, wasn't it?

What can WE do about it? Smart City sharing solution.

You're the fastest

Traffic jams do not apply to you. You go from point A to point B without any obstacles, and when others stand still you can go 50kmph. Wind in your hair, a wide smile on your face and you already know that you are the winner.

You are efficient

Clear billing system - we guarantee no additional fees, you do not need to refuel your scooter, you do not pay for parking, you do not need any additional insurance.

You are eco- friendly

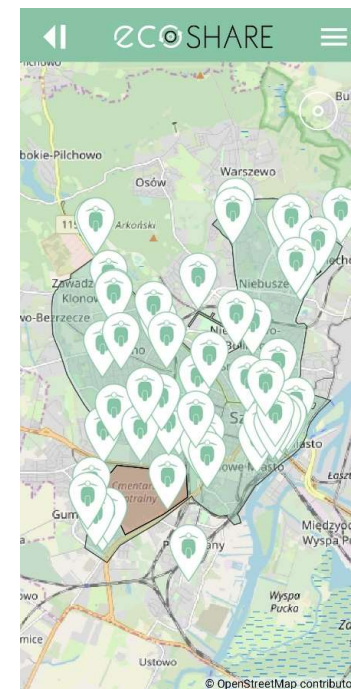

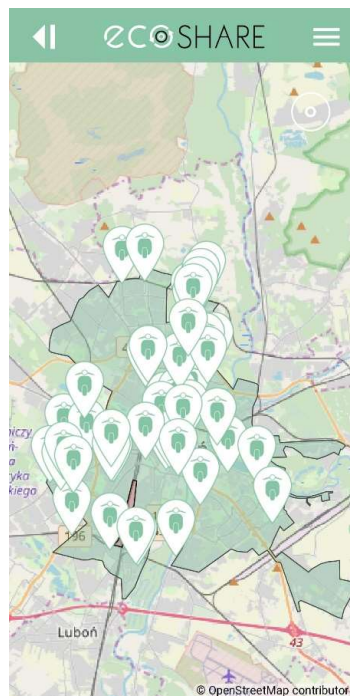

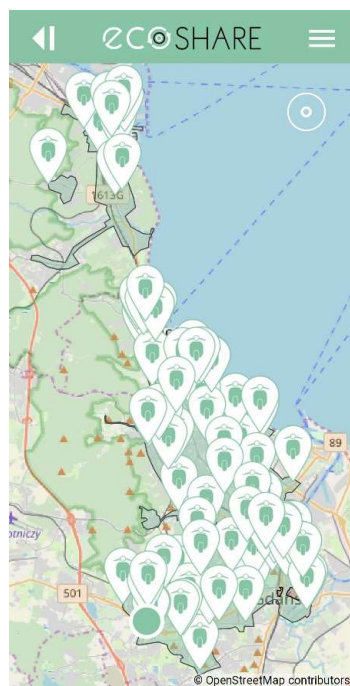

Scooters are zero-emission vehicles, meaning they do not release carbon oxides, sulfur and other harmful substances. Thus you have the right to enter clean zones, as well as you are improving the air quality.

You are on time

Finding a parking space in the city center has always been a problem. Not for you! Our scooter, thanks to its compact size, can be parked almost anywhere.
